

Press Release

Sysgenic Group started the iBS Xtended ERP implementation at Nett Front

Starting October 2010, the business analysts and developers from Sysgenic Group began the implementation of iBS Xtended ERP according to the specific requirements of Nett Front, one of the major local manufacturers of kitchen doors and furniture.

Nett Front Company, headquartered in Targu Mures, with a distribution network in all major cities in Romania, will benefit from business analysts, implementors and developers from Sysgenic Group to fulfill their needs. The modules contracted by the company are: Accounting, Management, HR&Payroll, Statistical Analysis, Fixed Assets, Inventory and Management Contracts. In addition, Nett Front will receive a customized online orders module which will be integrated within iBS Xtended and will facilitate the launch of work orders from the network of distributors directly into production.

The main reasons Nett Front chose iBS integrated solution were the close collaboration between the ERP selection team and Sysgenic sales staff during the pre-sales process, the application's flexibility and the customizations to be made for the company's specific production, as well as the excellent value of the services vs. acquisition price.

The next step of this collaboration will be the analysis and the implementation of a similar application for the partner company in Hungary, major shareholder in the Romanian. The future implementation will be the first outside Romania for iBS Xtended, an extremely important acquisition in Sysgenic Group's customer portfolio.

Sysgenic Group is a network of IT&C companies which, in the last 12 years, has invested in training a team of professionals - economists, developers, market analysts, IT specialists, enabling the development and positioning on the market of an ERP (Enterprise Resource Planning System), but simultaneously offering outsourcing services to both Romanian and International companies, especially in custom software development for banking and financial markets in the United States and Europe.

Sysgenic Group is "Microsoft Gold Certified Partner" since 2005, the same year the company obtained ISO 9001:2000 certificate for Quality Management for all companies in the group, since 2006 is Oracler Certified Partner and since August 2007 is CMMi Level 3 certified.

iBS Xtended, iBS Financials and iBS Medicals are Trade Marks of Sysgenic Group.
