

June 2010

Press release

**Sysgenic Group starts a pilot-project for the Medical sector with
Intermed Service Lab Cluj-Napca**

“This pilot represents a real challenge both for the business analysts and the developers from Sysgenic, as the project consists of two new industry specific modules, the “laboratory analysis module” and the “hospital/patients module”.

With the help of Intermed personnel, Sysgenic analysts wrote all the requirements for the two new modules and integrated them with the existing modules of iBS ERP, so the medical Clinic can run its entire business based on single solution: iBS Medicals.

iBS Medicals is Sysgenic’s new product and consists of the following modules: Laboratory, Hospital, Pharmacy Stocks and sales, Accountancy, HR & Payroll, Contracts management, on-line reporting systems.

The project was a success as now the Clinic and its patients benefit from the on-line reporting system and also from the web-based

Intermed is a private medical Clinic from Cluj-Napoca that entered into the market at the beginning of 2010. They invested a huge amount of money for the state-of-the-art equipment and laboratory analyzers.

Sysgenic Group is a network of companies in the IT & C in the last 12 years has invested in training a team of professionals - economists, lawyers, market analysts, IT specialists, enabling the development and market positioning of an ERP (Enterprise Resource Planning), an integrated Trading Suite for the Romanian Exchanges and lately a specific Medical Application for Clinics.

Sysgenic Group is "Microsoft Gold Certified Partner" since 2005, the same year that obtained ISO 9001:2000 certificate for Quality Management for all companies in the group. The 2007 becomes CMMi Level 3 certified, being among the top three firms in the country that have obtained this certification and the first outside Bucharest!
